KLENCO products are used in over 20 countries across Asia, the Middle East, Europe and Africa

Designed & Made in Germany

current models are derived from years of design advancements, feature enhancements and continuous quality improvements to what were already proven machines from the world's leading professional upright vacuum cleaner manufacturer. These highly ergonomic & premium quality machines deliver the ultimate carpet vacuuming performance.

Upright vacs clean carpets better than canister vacs. The powered brush 'combs' the carpet pile, loosening embedded dirt to be sucked away. They increase productivity as the user is less fatigued from pushing/pulling the wheeled suction head.

All SEBO uprights feature:

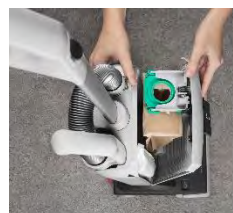

- telescopic hose system for cleaning hard-to-reach areas
- 3 stage filtration system w/3-ply high performance paper filter bag
- safety catch prevents machine operation without filter bag fastened
- electronic monitoring and indication of brush wear and filter bag status
- on-board accessories always within reach
- flat-to-the-floor profile for cleaning under furniture

aroma as you vacuum

SEBO DRY CARPET CLEANING SYSTEM

This system comprises duo-P carpet cleaning powder, the duo dual brush machine and any SEBO upright vacuum. duo-P powder consists of micro-sponges which comprises solvent for grease removal, a neutral shampoo for non-greasy soil and anti resoilant to delay re-soiling. It also has anti-bacterial properties and is proven to eradicate dust mites.

The duo brushing machine features twin contra-rotating brushes that open up the carpet pile to allow duo-P to work deep into the fibres. The powder breaks down soilage and disinfects as it is brushed through the carpet, leaving it clean and fresh.

2-Step Dry Cleaning System

Spread powder onto carpet evenly and work powder into area thoroughly with **duo** machine and leave residue in carpet for up to one hour. For spot cleaning, thorough manual brushing will suffice.

Clean up with SEBO upright vacuum machine.
